

AZIENDA

Da oltre 25 anni Top Light Illuminazione produce e commercializza sul territorio nazionale ed internazionale una vasta gamma di prodotti dal design moderno ed accattivante.

ORGANIZZAZIONE

Grazie alla vasta disponibilità di magazzino (oltre 5.000 referenze e 300.000 pezzi mediamente disponibili) è in grado di effettuare spedizioni in tempi molto brevi (24/48 h).

SERVIZIO

I clienti codificati hanno la possibilità, mediante il sistema B2B disponibile sul sito web aziendale, di verificare la disponibilità dei prodotti a magazzino, di effettuare ordini e di ottenere molte altre informazioni.

Tender

1181

Collezione di lampade a sospensione composta da uno o più elementi in vetro soffiato regolabili in altezza e disponibili in diverse finiture. La serie viene completata da due lampade da parete, una da plafone e una lampada da appoggio.

Le finiture dei vetri sono trasparente, bianco fog, ambra, verde, blu e fumè.

Le strutture in metallo sono disponibili nelle finiture cromo, bianco e ottone satinato.

Per la composizione di tipologie diverse da quelle mostrate consultare le istruzioni a pag.11

Double Skin

1176

Collezione di lampade a sospensione composta da uno o più diffusori in vetro pirex soffiato regolabili in altezza.

Ogni elemento è disponibile in 3 forme differenti (Alpha, Beta e Gamma) ed è caratterizzato da un doppio vetro, bianco all'interno e in diverse colorazioni all'esterno.

La serie viene completata da una lampada da appoggio, una da plafone e da una lampada da parete.

Le finiture dei vetri sono trasparente, verde, fumè, blu e ambra.

Le strutture in metallo sono disponibili nelle finiture cromo, bianco e ottone satinato.

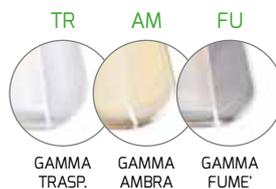

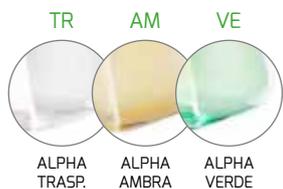

Per la composizione di tipologie diverse da quelle mostrate consultare le istruzioni a pag.36

Future

1155

Collezione di lampade a sospensione composte da una o più ampole in vetro pirex soffiato di varie dimensioni.
Lampade a parete disponibili nelle versioni con vetri piccoli.

Le finiture dei vetri cromo, rame, oro e ambra sono trattamenti superficiali che riducono solo parzialmente l'emissione luminosa.

La finitura trasparente può essere naturalmente abbinata alle altre. Le strutture in metallo sono disponibili nelle finiture cromo, bianco e ottone satinato.

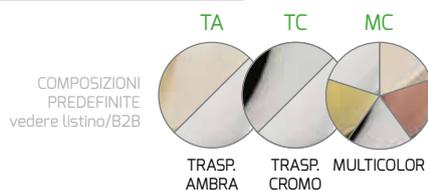

Per la composizione di tipologie diverse da quelle mostrate vedere le istruzioni a pag. 52

Shaded

1164

Collezione di lampade a sospensione composta da uno o più coni in vetro pirex soffiato regolabili in altezza.

La serie viene completata da una lampada da appoggio, una da plafone e due modelli di lampada da parete.

Le finiture dei vetri cromo, rame e ambra sono trattamenti superficiali sfumati verso il basso.

Le strutture in metallo sono disponibili nelle finiture cromo, bianco e ottone satinato.

Per la composizione di tipologie diverse da quelle mostrate consultare le istruzioni a pag. 63

Drop

1134

Collezione di lampade a sospensione composte da una o più gocce in vetro soffiato e lampade da parete disponibili nelle versioni con vetri piccoli.

Le finiture Cromo e Rame sono trattamenti superficiali che riducono solo parzialmente l'emissione luminosa creando delle trasparenze e degli effetti che rendono l'ambiente circostante rilassante e sofisticato.

La finitura graniglia è realizzata mediante l'applicazione di granuli di vetro sul vetro trasparente che, una volta illuminato, lo rendono brillante.

Le strutture in metallo sono disponibili nelle finiture cromo, bianco e ottone satinato.

E' possibile acquistare separatamente l'adattatore da E14 ad E27 che permetterà l'installazione di lampadine con attacco E27.

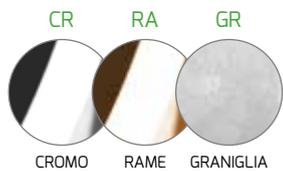

Per la composizione di tipologie diverse da quelle mostrate consultare le istruzioni a pag.88

Tornado

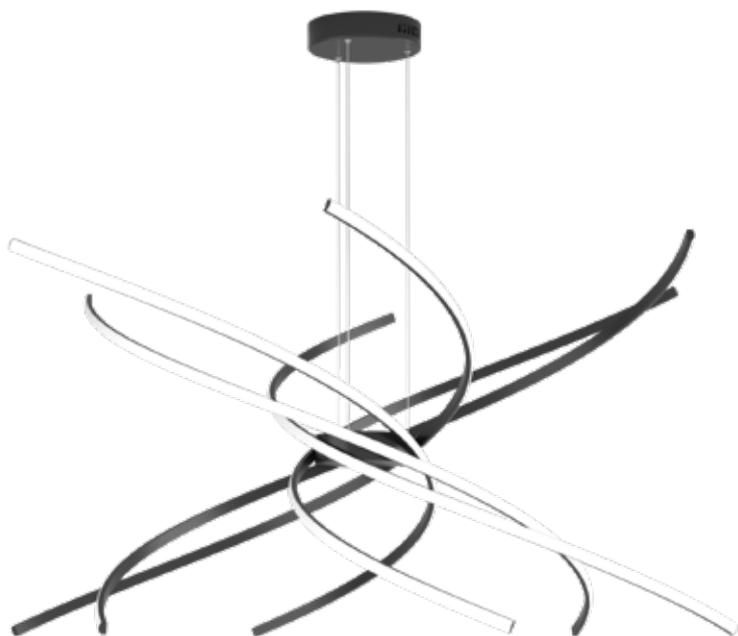

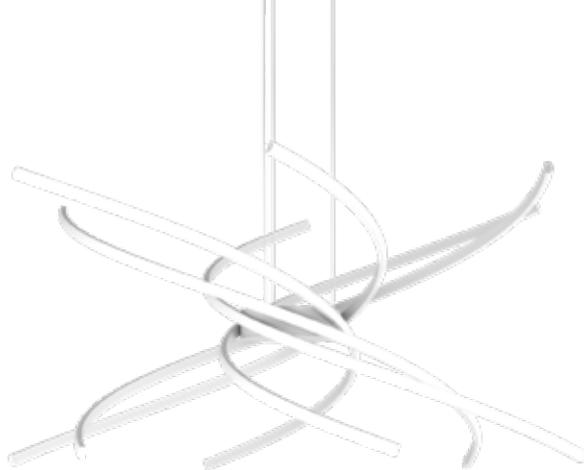

1163

Collezione di lampade a sospensione, parete, plafone e tavolo realizzata con profili curvi in alluminio che creano un movimento circolare ampio ed allo stesso tempo essenziale.

Le sospensioni danno la possibilità di sostituire le singole sorgenti luminose senza necessità di sostituire l'intero prodotto e sono disponibili con led a luce calda (3000°K) o naturale (4000°K).

Tutti gli altri prodotti che completano la collezione sono dotati di switch che consente di selezionare la temperatura colore della luce tra 3000°K e 4000°K in fase di installazione.

Le sospensioni sono regolabili in altezza e disponibili in quattro colorazioni mentre tutti gli altri prodotti in 3 colorazioni

Four Squares

1162

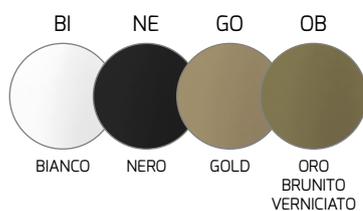

Collezione di lampade a parete e plafone realizzata con profili di alluminio che uniti fra loro creano quattro quadrati di diverse dimensioni producendo un'estetica allo stesso tempo sofisticata ma minimale.

I punti di forza del prodotto sono l'importante resa luminosa, la sostituibilità del singolo modulo quadrato in caso di malfunzionamento e la possibilità di scelta della colorazione della luce fra 3000K e 4000K che può essere scelta in fase di installazione (mediante degli switch ed eventualmente anche cambiato in seguito) essendo il dispositivo dotato contemporaneamente di led di entrambi le colorazioni.

La serie viene completata da due modelli di applique e da una lampada da appoggio aventi le medesime caratteristiche tecniche e switch per cambio di colore.

Floppy

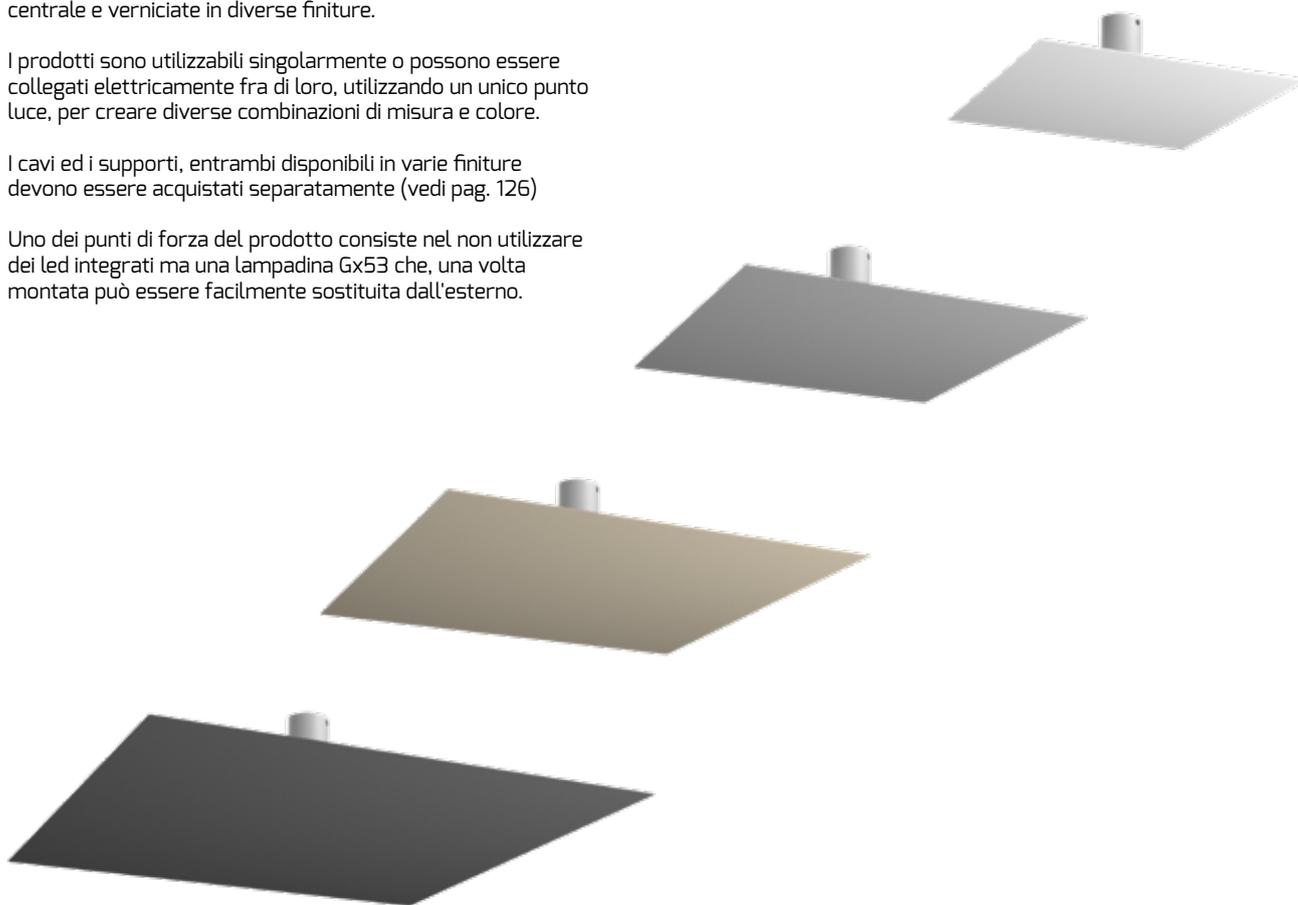

1185

Collezione di lampade a parete e plafone di forma quadrata, realizzate da lastre di metallo sostenute da un tubolare centrale e verniciate in diverse finiture.

I prodotti sono utilizzabili singolarmente o possono essere collegati elettricamente fra di loro, utilizzando un unico punto luce, per creare diverse combinazioni di misura e colore.

I cavi ed i supporti, entrambi disponibili in varie finiture devono essere acquistati separatamente (vedi pag. 126)

Uno dei punti di forza del prodotto consiste nel non utilizzare dei led integrati ma una lampadina Gx53 che, una volta montata può essere facilmente sostituita dall'esterno.

Rotation

1160

Collezione di lampade a parete e plafone realizzate con cubi di metallo roteanti a 360°, fornendo così la possibilità di orientare la luce in tutte le direzioni semplicemente modificandola all'occorrenza.

Il punto di forza del prodotto consiste nel non utilizzare dei led integrati ma una lampadina Gx53 che, una volta montata, può essere facilmente sostituita dall'esterno.

La serie viene completata da una lampada da appoggio e da una sospensione regolabile in altezza e dotata di dispositivi per la regolazione automatica dei cavi di acciaio.

Hexagon

1142

Collezione di lampade esagonali formate da lastre di metallo verniciato in diverse finiture.

I componenti base sono due: uno con sorgente luminosa (1142/1L) e uno solo decorativo (1142/1D).

Questi componenti possono essere assemblati fra loro per creare infinite forme e mix di colori.

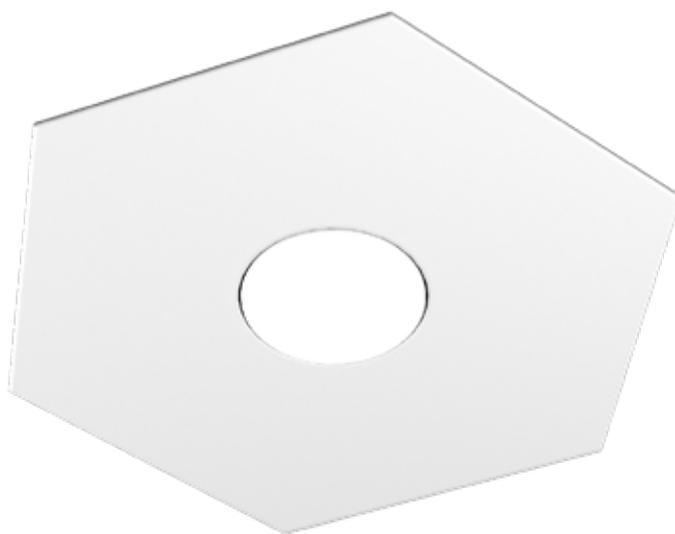

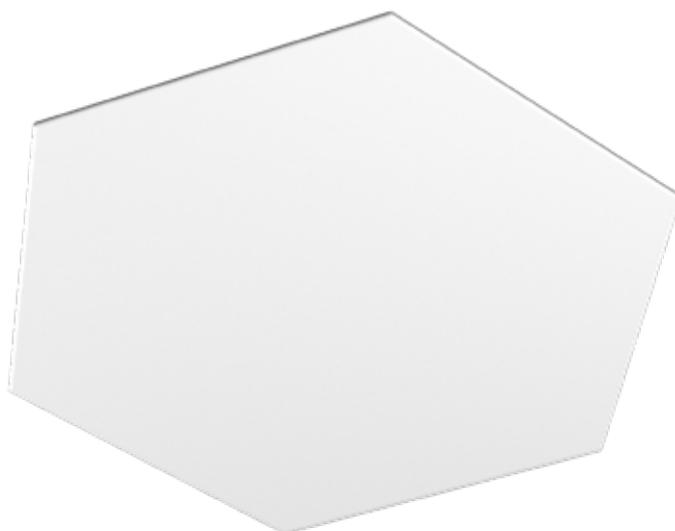

Per comodità vengono proposti alcuni kit precomposti con codice dedicato.

La presente collezione in quanto componibile è indicata per risolvere problemi di decentramento tra punto luce e zona da illuminare.

Un altro punto di forza del prodotto consiste nel non utilizzare dei led integrati ma una lampadina Gx53 che, una volta montata, arriva a filo della lastra metallica e può essere facilmente sostituita dall'esterno.

La collezione viene completata da una plafoniera e una sospensione monoscocca a 3 e 6 luci.

La sospensione può essere sia monoemissione che biemissione.

Esempi di composizioni aggiuntive possibili:

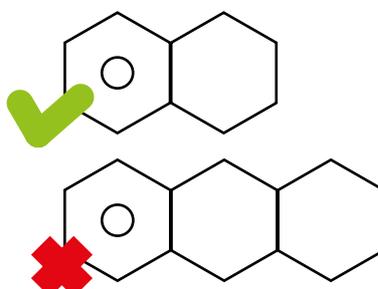

I componenti esagonali luminosi (1142/1L) possono essere assemblati fra loro illimitatamente.

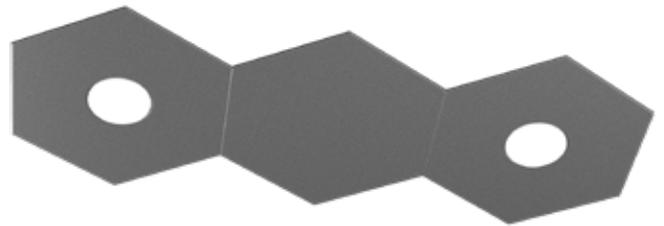

Le due regole da rispettare sono:

1. Tra due esagoni luminosi (1142/1L) può esserci solo un intervallo di massimo due componenti decorativi (1142/1D) (vedi esempio)

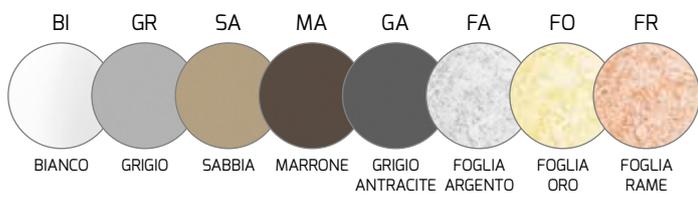

2. È possibile posizionare al massimo un elemento decorativo a sbalzo:

Cloud

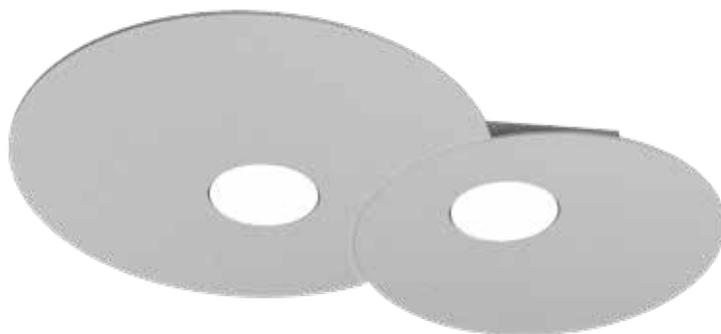

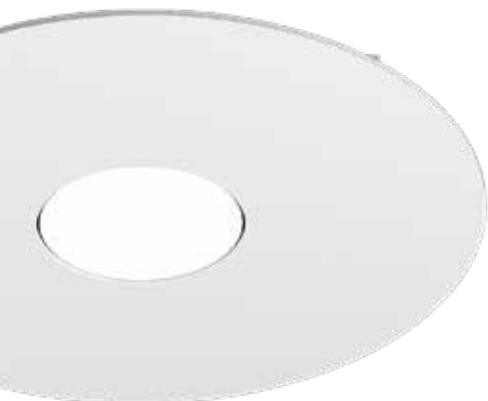

1128

Collezione di lampade a plafone e sospensione realizzate con lastre di metallo sulle quali sono state effettuate delle lavorazioni di fresatura che creano giochi di cerchi sovrapposti.

Le sospensioni sono disponibili sia nella versione monoemissione che nella versione biemissione.

Il punto di forza del prodotto consiste nel non utilizzare dei led integrati ma una lampadina Gx53 che, una volta montata, arriva a filo della lastra metallica e può essere facilmente sostituita dall'esterno.

La serie viene completata da un'ampia gamma di applique e da tre modelli di sospensioni e plafoniere tubolari.

Eccentric

1156

Collezione di lampade quadrate formate da lastre di metallo verniciato in diverse finiture.

I componenti base sono due: uno con sorgente luminosa (1156/1L) e uno solo decorativo (1156/1D).

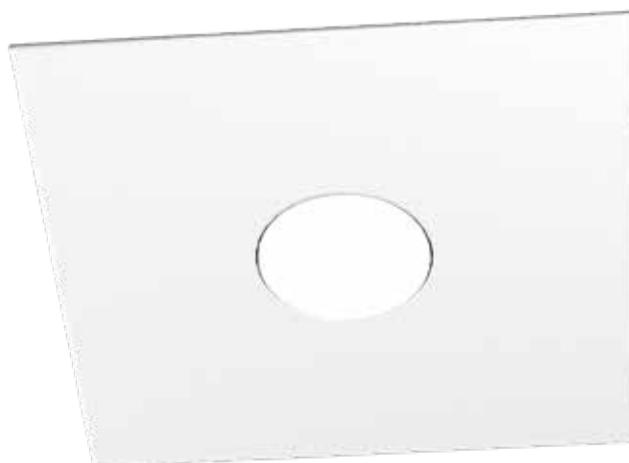

Questi componenti possono essere assemblati fra loro per creare infinite forme e mix di colori.

Per comodità vengono proposti alcuni kit precomposti con codice dedicato.

La presente collezione in quanto componibile è indicata per risolvere problemi di decentramento tra punto luce e zona da illuminare.

Un altro punto di forza del prodotto consiste nel non utilizzare dei led integrati ma una lampadina Gx53 che, una volta montata, arriva a filo della lastra metallica e può essere facilmente sostituita dall'esterno.

La serie viene completata da un'ampia gamma di applique.

Esempi di composizioni aggiuntive possibili:
I componenti luminosi (1156/1L) possono essere assemblati fra loro illimitatamente.
Le due regole da rispettare sono:

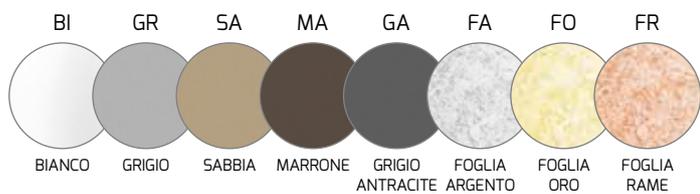

1. Tra due quadrati luminosi (1156/1L) può esserci solo un intervallo di massimo due componenti decorativi (1156/1D) (vedi esempio)

2. È possibile posizionare al massimo un elemento decorativo a sbalzo:

 Led 12W
 230V

Collezione di lampade formate da una lastra di metallo verniciato in diverse finiture. Le quattro misure disponibili (40, 50, 60, 70) possono essere utilizzate singole oppure montate ed unite fra di loro mediante dei kit meccanici ed elettrici inclusi in tutte le confezioni.

In questo modo si ha la possibilità di creare infinite combinazioni geometriche e cromatiche.

Il punto di forza del prodotto consiste nel non utilizzare dei led integrati ma una lampadina 2G11 che è alloggiata dietro ad una lastra di metacrilato opale e può essere facilmente sostituita.

Le lampade da parete a luce indiretta (A30, A40, A50, A60, A90, A120) montano un metacrilato prismatico che favorisce la diffusione del flusso luminoso.

Cilinder

1078

Collezione di lampade con struttura metallica cromata composte da uno o più cilindri in vetro pirex satinato con bordi trasparenti.

Ogni cilindro ha diametro 8cm e altezza 30cm ed è fissato al supporto metallico cromato mediante dei perni filettati.

Le sospensioni sono tutte regolabili in altezza mediante gli appositi serracavi.

Bullet

1097

Collezione di lampade composte da una struttura in metallo cromato che sorregge dei coni in pirex con parte esterna trasparente e parte interna satinata.

Il cono di vetro ha un diametro di 11cm ed una altezza di 21cm.

Le sospensioni sono tutte regolabili in altezza mediante gli appositi serracavi.
